SUMMARY

Experienced engineer with expertise in renewable energy systems, data science, and machine learning. Currently serving as an Associate in Energy Insights at Sproule, where I develop advanced energy models and provide strategic insights for the energy transition. Developed groundbreaking techniques for optimizing photovoltaic systems' performance using deep reinforcement learning, including novel maximum power point tracking methods. Recently earned an AI certification from Huawei and was selected for a fully-funded training program in Hangzhou, China, focusing on cutting-edge AI algorithms. Committed to driving sustainable solutions and staying at the forefront of emerging technologies.

EXPERIENCE

Associate, Energy Insights - Sproule, Mexico

Aug 2024 - Present

- Developed advanced energy models using machine learning algorithms to capture key variables and transition pathways, contributing to data-driven insights for energy transition strategies.
- Created data transformation pipelines to clean and transform data for modeling and analysis.
- Created visualizations to assess model performance, highlight feature importance, and improve interpretability.
- Communicated results and insights through concise updates and detailed documentation for the team.
- Participated in the hiring process for new members within the team.

Research Scientist (Ph.D. graduate) - UMSNH, Mexico

Mar 2018 - Feb 2022

- Managed data acquisition and cleaning for a weather station, processing over four million measurements across four years.
- Conducted time series forecasting experiments using deep learning algorithms for local irradiance, surpassing state-of-the-art models by improving prediction accuracy by over 0.8%.
- Developed a novel method using deep learning to characterize photovoltaic panels, reducing the parameter error estimation by 50% compared to the most widely used method.
- Innovated multiple maximum power point tracking techniques for photovoltaic systems utilizing deep reinforcement learning, surpassing the performance of state-of-the-art algorithms by increasing power generation by over 2%.

Adjunct Professor - UMSNH, Mexico

Oct 2015 - Aug 2019

Lectured several courses including Digital Electronics, Digital Control, Microcontrollers, and Instrumentation

EDUCATION

2018 - 2022	Ph.D. in Electrical Engineering at Universidad Michoacana (UMNSH)	(GPA: 4.0/4.0)
2015 - 2017	M.Sc. in Electrical Engineering at Universidad Michoacana (UMNSH)	(GPA: 4.0/4.0)
2009 - 2014	B.Sc. (<i>Hons</i>) in Electronics Engineering at Universidad Michoacana (UMNSH)	(GPA: 3.7/4.0)

Ph.D. Thesis [Deep Reinforcement Learning and Demonstrations Applied to Global MPPT in Photovoltaic Systems](#)

LANGUAGES

Spanish (Native), English (C1), Portuguese (A1)

SKILLS

PV Systems	Modelling, Characterization, Simulation, Maximum Power Point Tracking.
Time Series	Analysis, Modelling, Forecasting
Control Theory	Optimal Control, Sliding Modes, State Space, Observers.
Programming Languages	Python, MATLAB, C, JavaScript, VHDL
Machine Learning Frameworks	PyTorch, TensorFlow, Keras, Scikit-Learn, LightGBM, XGBoost
Deep Learning	NLP, Image Processing, Deep Reinforcement Learning
Big Data Tools	Apache Spark, Databricks
Cloud Platforms	Microsoft Azure, Huawei Cloud
Web Development	HTML5, JavaScript, CSS3

Version Control	Git, GitHub, GitLab
Database Management	SQL, MongoDB
Project Management	Agile, Scrum, Kanban, Atlassian Jira

CERTIFICATIONS

Agile with Atlassian Jira	(2024)
University of Michigan: Digital Twins	(2024)
Microsoft Certified: Azure Data Scientist Associate	(2024)
Databricks Lakehouse Fundamentals	(2024)
Huawei Advanced Training on Artificial Intelligence	(2024)
DeepLearning AI Deep Learning Specialization	(2024)
Huawei Certified ICT Associate-AI	(2024)
Stanford University & DeepLearning AI Machine Learning Specialization	(2023)
Microsoft Certified: Azure AI Fundamentals	(2023)
Google Advanced Data Analytics	(2023)
Google Data Analytics Certificate	(2023)

HONORS & AWARDS

Highest GPA of the 3rd Semester of the Doctoral Program in Electrical Engineering	(2019)
CENEVAL Award for Excellence in EGEL Performance	(2015)
First Place in the 2014 Technological Development Prototype Contest	(2014)
First Place of the Class in the Electronic Engineering Degree Program	(2014)

WORKSHOPS & SEMINARS

Efficient Computing in Python	(2019)
4th Workshop on Monitoring, Diagnostics, and Fault-Tolerant Control	(2016)
Sliding Mode for Engineering Application	(2015)
